

Redirect Auto Agent tasks to Personal Agent

The **Redirect AutoAgent Generated Tasks to User...** field on the Automatic Scans page of the Constants table allows the DBA to redirect Auto Agent tasks to the Personal Agent of a TechTracS user. This will allow the autogenerated letters and forms to print on the Personal Agent of the selected TechTracS user.

The screenshot shows a window titled "Constants: 1 of 1 records in selection". Inside, there's a section titled "Automatic Scans". On the left, a vertical toolbar contains icons for Accept, Cancel, Record, More, Print, and Help, along with the NASA TechTracS logo. The main area lists several scan tasks with checkboxes and associated settings:

- ☒ Scan for Contract_Grant Automatic Letters (with a "Contract/Grant scan now..." button)
- ☒ Scan Patent Statistics
- ☐ Scan for Total Patent Statistics
- ☒ Scan for Action Item Report
- ☒ Scan for Action Item Followup (with an "Action Item Followup now..." button)
- ☒ Automatically Purge After Days
- ☒ Scan for NASA Form 1546 - Tech Brief
Form 1546 Innovator Minimum
- ☒ Scan for NASA Form 1548 - Minimum Awards
Form 1548 Innovator Minimum
- ☒ Scan for NASA Form 1661 - COSMIC Report
Form 1661 Innovator Minimum
- ☐ Perform NASA eNTRe Scan
4D Backup run by... (0=None, 1=AutoAgent, 2=AutoWebAgent)
- ☐ Quit AutoAgent After Scan is Complete

At the bottom, there is a field labeled "Redirect AutoAgent Generated Tasks to User..." with an empty text box next to it.

If a username is typed in the [Constants]AutoAgent Redirect field, the AutoAgent print jobs will be queued in the specified user's Personal Agent queue. This field provides the capability to print the documents generated by nightly scans to a printer in a convenient location.

NOTE: Only jobs submitted by the Auto Agent are eligible to be redirected. Jobs that are submitted to the Auto Agent by users, such as Consolidates, are not redirected.
